

Workshop Engineer, Singapore

Seatronics Vision and Mission

Seatronics are the Marine Technology Specialists. With our solution focused culture, engineering strength and extensive product knowledge, our vision is to remain the leading provider of marine electronics solutions to the global subsea market. We supply specialist subsea solutions pursuing excellence both in engineering capability and customer support. Our continually developing expertise allows us to provide full service capability on demand encompassing rental, sales, service & repair, calibration, personnel and asset management.

Overall Purpose of Role

The Survey Systems Team is responsible for carrying out the testing, service and repair of both Seatronics owned and 3rd party equipment to manufacturer's specifications and tolerances following in house test procedures. As Workshop Engineer, you will undertake a number of tasks in preparing equipment for sale or rental including equipment interfacing, maintenance, servicing and re-certification all of which will be required in order to meet project deadlines.

Relationships: Reports to Workshop Manager, liaises with Line managers and engineering teams.

Key Responsibilities and Accountabilities

The responsibilities of the postholder will include but not be limited to the following:

- Testing/interfacing and fault finding of electronic survey equipment. Perform pre-hire/off-hire test on Seatronics rental equipment in line with Workshop procedures.
- Electronic repairs work and cable re-terminations
- Assist with the calibration of equipment to manufactures tolerances & specifications as per Seatronics procedures.
- Assist with the creation of accurate calibration/test documents
- Assist with accurate and organized documenting of calibration certificates and test sheets
- Point of liaison between suppliers, manufacturer's and customers as required
- Occasional field based equipment support to customers as required
- Occasional remote based equipment support to customers
- Monitor lab test/reference equipment calibration requirements and organize re-certification with minimal lab down time.
- Ensure the return of 3rd party equipment within the timescales agreed.
- Willingness to undertake other duties as and when required such as stock take, maintaining tidy work areas, copying, filing etc.

Experience and Qualifications

- NTech or equivalent in a relevant area; Electronics, Electrical Engineering, or Engineering Systems
- Experience of testing/interfacing and fault finding of electronic survey equipment
- Experience of Pcb investigation, soldering, crimping, mechanical assembly
- Experience of calibration of equipment to manufactures tolerances & specifications
- Solid experience of Microsoft Office suite; Word, Excel, PowerPoint and Outlook

Skills and Knowledge

- Knowledge of a full range of Seatronics' equipment
- Excellent organisational and time management skills
- Exceptional attention to detail with good analytical skills
- Strong problem solving skills
- Strong communication skills; e.g. report writing, customer service

Personal Qualities

- Customer focused with a forward thinking attitude
- Ability to work as part of a team
- Ability to work and make decisions unsupervised
- Outgoing team player with a professional approach able to communicate at all levels
- Ability to support the Workshop Manager in their duties
- Ability to work to tight deadlines and remain calm under pressure
- Conscientious and helpful
- Willingness to learn and participate/provide in-house training

Work Requirements

- Ensure effective self-management to work in accordance with the company's values, goals and objectives.
- Willingness to maintain Continual Professional Development to ensure your own knowledge base enhances Seatronics' capability and that you comply with the company's policies, processes and principles.
- Maintain integrity by being honest and transparent with staff, clients and suppliers in line with business policies.
- Highlight new technologies or working practices which may benefit the company by way of the Process Improvement Report (PIR) process.
- Actively participate in regular team and company events as required.
- Ensure we focus on being customer centric by developing good relationships with clients and suppliers and providing outstanding levels of service to ensure client needs are met on time, every time.
- Participate in the leadership and commitment of QHSE to ensure there is zero harm to our people, the environment and equipment.
- Take an active role in ensuring the quality of our products and services fully meets customer requirements.
- Ensure you work in line with various areas of compliance, including but not restricted to Customs/Export Control/Import/Anti-Bribery/Quality Assurance (QA).
- Ideally have a clean driving license and the ability to travel to global companies when necessary.
- Ensure you are deemed fit for the role or assignment being undertaken by undertaking medical examinations/tests and/or vaccinations in line with local legislation.
